Dear: Mr. Bussidor,

The Arviat HTO are pleased to support and work together to protect Indigenous ancestral lands from industrial development.

We are happy to commit working cooperatively in protecting the Seal River Watershed by governing resources, economy that may benefit our neighboring communities.

The board of directors' respect and honor the Treaty and Aboriginal Rights and responsibilities that will join this important desire to teach and value the area as identified on Schedule A.

Our ancestors have always wanted to respect the wildlife, namely the caribou as it is their main diet, thus, the Inuit Elders are continuing to protect the wintering and calving grounds of Beverly and Qamanirjuaq caribou herds over the past centuries and will continue for the next future generations.

We are excited to be part of this very important preservation to enhance Indigenous cultures for our future generations.

Thank you.

Yours truly,

Chairperson

Thomas Alikaswa
